

Glasbord®

wall and ceiling panels

fiberglass panel with *Surfaseal*®

The ONLY frp with Surfaseal

Use **Glasbord** panels in the "back room" for a sanitary and durable finish that meets USDA/FSIS requirements.

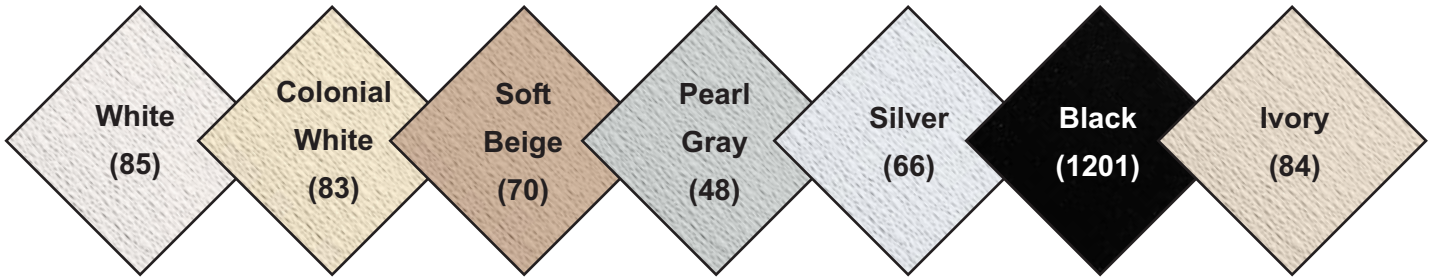

What is Surfaseal?

Surfaseal is a sealed protective finish that makes Glasbord up to 10 times easier to clean than other frp panels and up to 6 times more stain resistant. Remember, there's only one Glasbord with Surfaseal - a wall and ceiling frp panel that gives you the confidence of knowing that it will stand up under abuse time and time again!

- **Mold & Mildew Resistant** - Glasbord's entire panel is moisture resistant - not just the surface. It does not support mold or mildew (per ASTM D3273 and ASTM D3274). It will not rust or corrode in wet or humid environments.
- **Easy to Clean** - A mild cleanser and a soft brush are typically the only things needed to clean a wall or ceiling covered with Glasbord panels.
- **Tough** - Glasbord fiberglass reinforced plastic (frp) is designed and engineered to be extremely tough. Highly resistant to scratches, abrasion, and other staining. Glasbord is up to 2 times more abrasion resistant than other frp panels - ideal in applications where conditions are harsh and durability is a must.
- **Easy to Install** - Glasbord panels can be cut and drilled for quick, easy installation. Accessories such as color coordinated moldings and rivets are also available to complete the installation.
- **Fire rating** - Class A and Class C fire rated per ASTM E-84. Meets Canadian code CAN/ULC-S102 test method results of <150 flame spread and < 300 smoke developed.
- **Factory Mutual Approved** - Factory Mutual Approved panels are also available.

COLORS:

IDEAL FOR:
